MICROSOFT COPILOT READINESS ASSESSMENT

Microsoft Copilot empowers teams to work smarter and more flexibly. However, unlocking its full value requires strategic alignment, technical preparedness, and organizational readiness.

Avertium's Microsoft Copilot Readiness Assessment evaluates your Microsoft 365 and Azure technical controls to identify gaps and build a roadmap for successful Copilot adoption. This assessment ensures your security controls are configured to prevent data leakage and that Copilot only accesses appropriate data.

The assessment covers your entire Microsoft landscape to determine your security maturity, emphasizing identity and access management, to establish a foundation of data-centric security controls for a safe Copilot rollout.

Here's what you get with a Microsoft Security Copilot Copilot Readiness Assessment from Avertium:

- **A complete review of your Microsoft 365 environment:** Avertium reviews your E3 or E5 products and supporting services such as Entra, Defender, Intune, Teams, Exchange, SharePoint, OneDrive, and Purview.
- **An evaluation of your Azure security toolset coverage with assigned maturity ratings:** Avertium reviews your organization's fundamental Azure environment, including Microsoft Sentinel, to evaluate your current security posture as it relates to data and network security, boundary defenses, encryption, operational practices, identity + access management, and related features + functions.
- **A remediation roadmap:** Avertium provides you with a comprehensive report including detailed remediation recommendations to ensure your organization understands what it takes to securely adopt Microsoft Copilot.

WHO IS MICROSOFT'S COPILOT READINESS ASSESSMENT FOR?

ORGANIZATIONS LEVERAGING MICROSOFT 365

Enhanced productivity, strengthened security posture, and simplified management through an integrated suite of tools and services.

ORGANIZATIONS INTERESTED IN LEVERAGING COPILOT

Improved threat detection and response capabilities, reduced time to detect and mitigate security incidents, and 360-degree visibility into the organization's security posture through Microsoft Sentinel.

ORGANIZATIONS THAT MUST INNOVATE

Creativity, competitive advantage and enlightened decision-making through AI-powered assistance across your Microsoft landscape.

BENEFITS OF MICROSOFT SECURITY COPILOT

Understanding whether you are ready for Microsoft Copilot can be challenging. Avertium's streamlined approach saves your team the time and bandwidth needed to assess your AI maturity.

- **Address Coverage Gaps with Certainty:** Take the unknowns out of your Copilot adoption. Avertium identifies coverage gaps and validates the strength of your security controls before deployment, ensuring a secure and responsible rollout.
- **100% Compliant, 100% of the Time:** Microsoft Copilot Readiness Assessment is aligned with regulatory requirements, industry standards, and best-practice frameworks to ensure you're compliant across the board.
- **Accelerate Copilot Adoption, Free of Risk:** Avertium's efficient approach requires a minimal amount of your time and read-only access to your systems, eliminating risk and fitting seamlessly into your day-to-day security operations.
- **Make the Most of Your Microsoft Investment:** Our Microsoft Copilot Readiness Assessment is connected to all other Copilots and your existing Microsoft toolkit so you can maximize the value across your security controls.
- **Expert Guidance, Actionable Recommendations:** Get a step-by-step roadmap for your Copilot remediation.
- **Tailored to Your Business:** Security must be applied with context of organizational processes and desired outcomes in mind. Avertium's approach is customized to work for your business, your security environment, and your goals.

HOW IT WORKS

We leverage guidance from multiple security frameworks in a phased approach:

PHASE 1 | DISCOVER ⓘ Collect security control and maturity data across the Microsoft cloud platform.

PHASE 2 | ASSESS ⓘ Compile findings and map them to multiple security frameworks to create a comprehensive gap analysis.

PHASE 3 | SYNTHESIZE ⓘ Create recommendations and establish a roadmap for implementation.

PHASE 4 | INTEGRATE ⓘ Optionally establish procurement schedules, timelines, and allocate resources to implement remediations.

WHY AVERTIUM?

Business-First Security: Avertium tailors security strategies to your business, striking the delicate balance between security and functionality.

Fusion Engine: Avertium identifies and translates security weaknesses into clear, digestible recommendations, connecting business and security.

Human Element: Security strategy relies on a human touch. Avertium helps your team make informed, context-driven decisions by thoroughly understanding your business, risk tolerance, and overarching objectives, then tailoring our approach to fit them.

OUTCOMES

MORE SECURE

Thorough evaluation of your existing security setup that helps you address vulnerabilities and align with industry regulatory standards and best practices.

MORE COMPLIANT

Clear path to greater compliance through a thorough assessment of security gaps, aligned with applicable regulations and standards, and supported by a detailed roadmap for implementing essential improvements.

MORE ROI

Measurable gains in productivity, cost savings, and business agility through significantly improved efficiency, boosted employee engagement and accelerated business outcomes.
